

# SHAPES

Donna is a 92-year-old Italian woman for whom memories are a very important part of her life. She is very fond of her family and remembering times when her husband was alive, and her children were younger, makes her really happy.

She spends a lot of time reading a book that her husband wrote about their life and looking at the letters that her children wrote to them when they were at school. But, above all, she loves to look at photographs.

Thanks to **SHAPES project** she now can use the **social assistive robot KOMPAĬ** that will allow her to look at her personal and family photographs, and help her in daily tasks by reminding her of medicine intake and appointments.

With this social assistive robot, Donna will also be able to play games, check the weather provision and the horoscope, watch videos, listen to music or audio stories, and talk to her family via videocalls.

**Donna's full story:**  
*"A Captured Glance,  
A Lifetime of Memories"*.

## PROJECT DATA

**PROGRAMME:** H2020-EU.3.1.4.1. – Active Ageing, Independent and Assisted Living and H2020-EU.2.1.1.3. – Future Internet: Software, Hardware, Infrastructures, Technologies and Services

**TYPE OF ACTION:** Innovation Action

**DURATION:** 48 months (1 nov 2019 – 31 oct 2023)

**PROJECT BUDGET:** € 20.944.318,75

**CONSORTIUM:** 36 partners from 14 European countries

**COORDINATOR:** Maynooth University
