

SHAPES

Smart and Healthy Ageing through People Engaging in Supportive Systems

The **SHAPES Project** aims to create an open platform for healthy and independent living addressed to older persons who face reduced functionality and capabilities. The project is building, piloting, and deploying a wide range of technological, organisational, clinical, educational, and social solutions on a large-scale. The **SHAPES Digital Solutions** cover multiple areas including IoT and Big data Platforms, online communication and accessibility tools, cognitive stimulation and rehabilitation, conversational assistants and chatbots, solutions based on robotics, health and wellbeing platforms, solutions to ensure security, COVID-19 response tools as well as solutions in data analytics, such as predictive systems and wellbeing assessment tools.

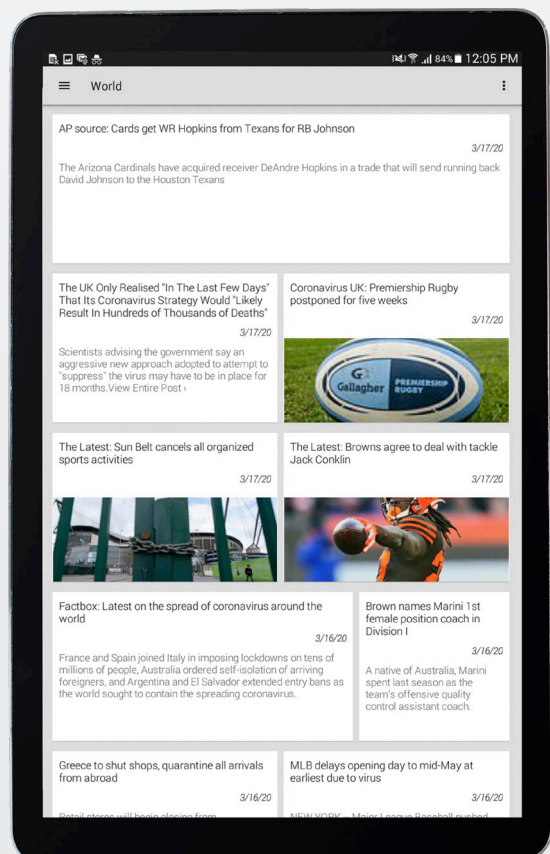

NewSum Mobile Application

SciFY - Science For You (SciFY), Greece

Pilot Sites: Greece and Germany.

NewSum, SciFY's app, automatically summarises information from many sources and combines them in a single text. With the use of artificial intelligence technology, the application gives the main points of all the different information that one would get if one would read all the articles from the sources visited.

Besides news on Europe, business, technology and more, **NewSum** offers short summaries of news on active aging, linking to the original source if the users want to read more. The app is an open-source project, is offered for free without ads and is available in English and in Greek on Android phones.

PROJECT DATA

PROGRAMME: H2020-EU.3.1.4.1. – Active Ageing, Independent and Assisted Living and H2020-EU.2.1.1.3. – Future Internet: Software, Hardware, Infrastructures, Technologies and Services

TYPE OF ACTION: Innovation Action

DURATION: 48 months (1 nov 2019 – 31 oct 2023)

PROJECT BUDGET: € 20.944.318,75

CONSORTIUM: 36 partners from 14 European countries

COORDINATOR: Maynooth University
